

Настройка стандартного фида и маппинг с категориями Google Merchant Center для версий модуля:

- manyFeed 5 PRO Edit.
- manyFeed 5 Basic Edit.

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Настройка стандартного фида и маппинг с категориями Google Merchant

1. Для быстрой интеграции с Google Merchant, необходимо наличие ряда основных данных о товаре, настройка передачи которых будет описана ниже
2. Войдите в модуль maneFeed 5, кликнув на карандаш справа от названия модуля

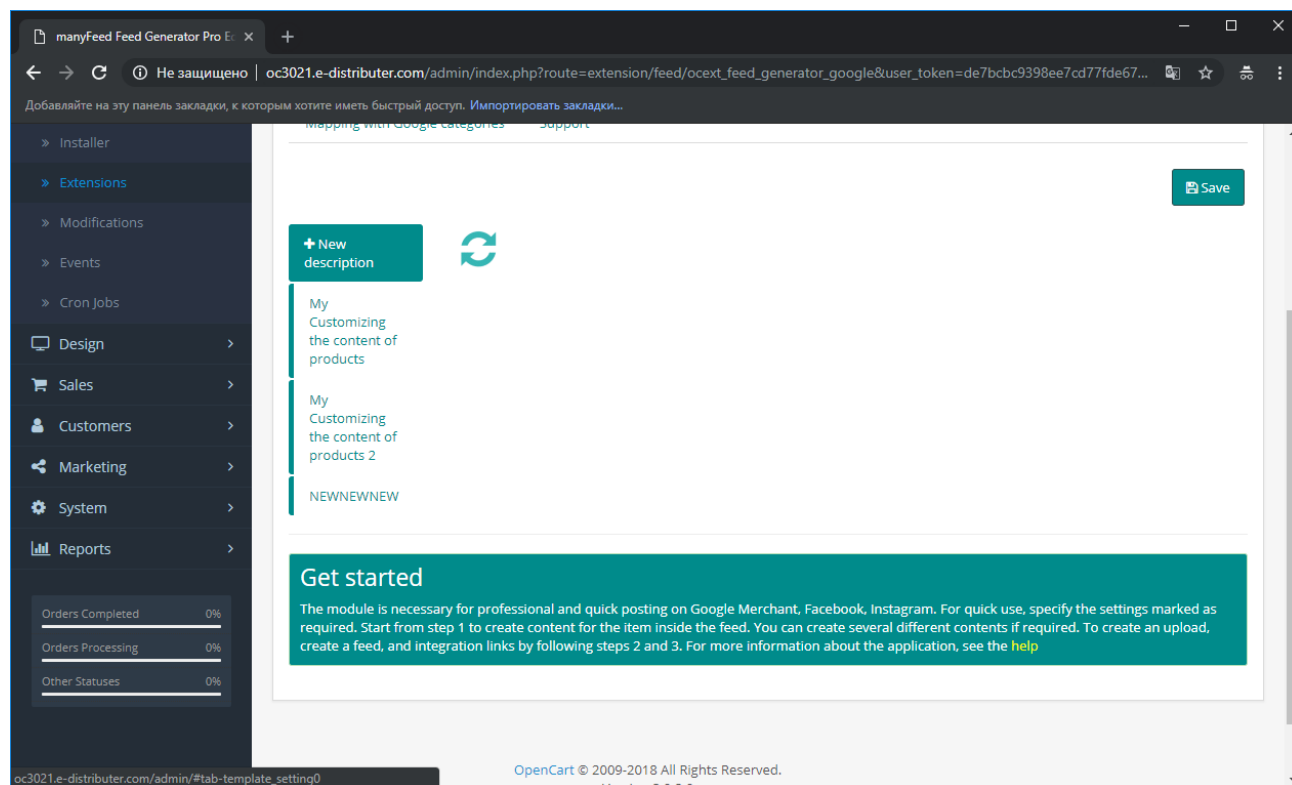

Product Feed Name	Status	Action
Google Base	Disabled	
Google Sitemap	Disabled	
Avito Product Feed Generator - генератор XML для Avito	Enabled	
maneFeed Google XML Feed Generator	Enabled	
multiXML Модуль создания расширенных XML-файлов Документация Поддержка	Disabled	
heading_title	Disabled	
OpenBay Pro	Disabled	

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Настройка стандартного фида и маппинг с категориями Google Merchant

3. Войдите в закладку 1, и нажмите на закладку: «+Новое описание»

«Описания» - это шаблоны настроек информации о товаре, которые можно применить разным товарам сайта, в зависимости от категории, или производителя или другого значения у товара. Например, если необходимо делать выгрузку специальных цен только у определенных товаров, или нужно разделить товар OpenCart по цвету (создать вариации по цвету) только у товаров в категории «такой-то», то Вам нужно создать описание с настройками под каждый такой случай. Если все товары должны иметь одинаковое содержание, то достаточно создать одно описание, и в последующем применять только его, как это будет показано на следующих шагах инструкции

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Настройка стандартного фида и маппинг с категориями Google Merchant

4. В появившемся окне настроек сделайте следующие настройки
 - а. Придумайте любое название этому описанию, чтобы позже знать, какого рода настройки в нем находятся

The screenshot shows the maneFeed 5 admin interface in a web browser. The browser's address bar displays the URL: `oc3021.e-distributer.com/admin/index.php?route=extension/feed/ocext_feed_generator_google&user_token=de7bcb9398ee7cd77fde67...`. The left sidebar contains a menu with items: Installer, Extensions, Modifications, Events, Cron Jobs, Design, Sales, Customers, Marketing, and System. The main content area is titled "mapping with Google categories" and features a "Save" button in the top right corner. On the left, there is a list of categories: "Стандартный фид" (highlighted in teal), "My Customizing the content of products", "My Customizing the content of products 2", and "NEWNEWNEW". The "Стандартный фид" category is expanded, showing a configuration form. The form includes a section "Take based on the previously created description ..." with a "Choose" dropdown menu. Below this, there is a field "The name of this description" containing the text "Стандартный фид". A teal header bar with the text "title: Product name setup" is present. Underneath, there are three rows, each with a "Disabled" dropdown menu. The first row is labeled "The way of forming the product name - title (required)".

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Настройка стандартного фида и маппинг с категориями Google Merchant

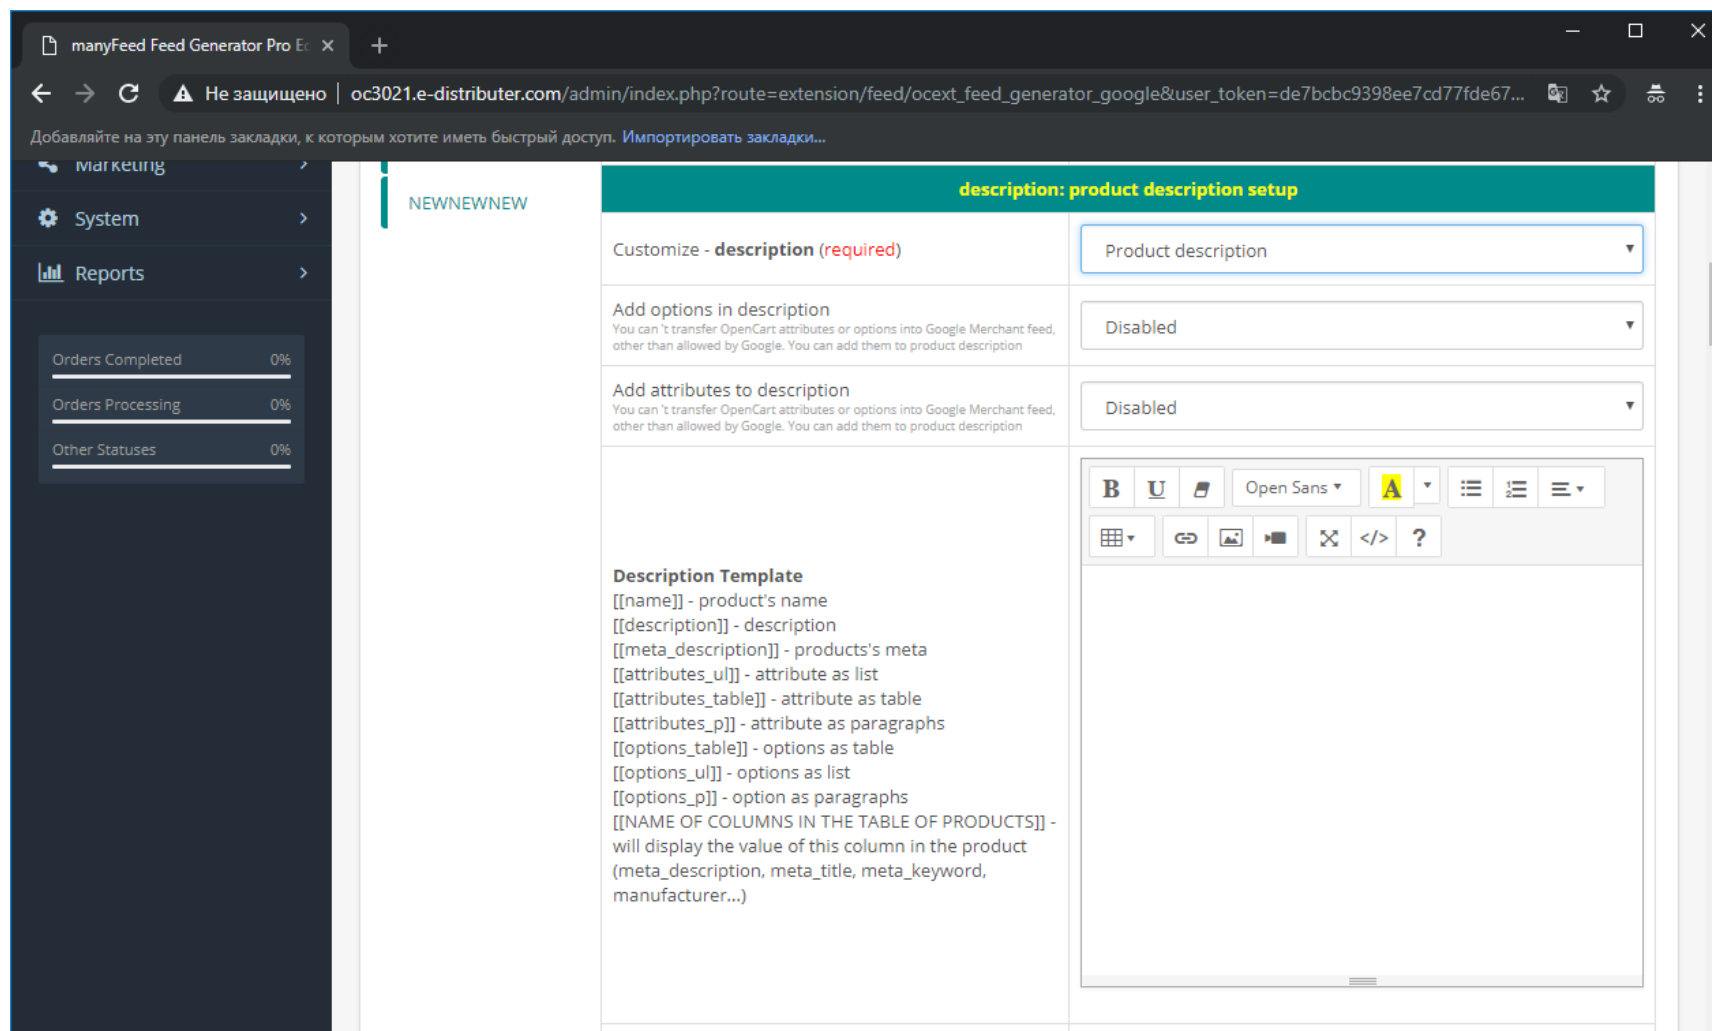

- b. Выберите источник данных для названия товара. Если Вам требуется стандартное название из карточки товара, то выбирайте «Название товара». Вы также можете сделать название, собранное из разных элементов данных товара, или из какого-либо поля товара, например мета данных

The screenshot shows the maneFeed 5 admin interface. On the left is a sidebar with navigation links: Customers, Marketing, System, and Reports. Below these are status bars for Orders Completed, Orders Processing, and Other Statuses, all at 0%. The main content area is titled 'My Customizing the content of products 2'. It contains several sections: 'The way of forming the product name - title (required)' with a dropdown set to 'Disabled'; 'Customize - description (required)' with a dropdown set to 'Product name'; 'Add options in description' and 'Add attributes to description' sections with explanatory text. A 'Description Template' section lists various template tags like [[name]], [[description]], [[meta_description]], etc. A dropdown menu is open, showing a list of product attributes: Product's Meta-title, Product's ID, Model, SKU, UPC, EAN, JAN, ISBN, MPN, Location, Manufacturer, Price, Weight, and Sizes. The 'Product name' option is highlighted in blue.

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Настройка стандартного фида и маппинг с категориями Google Merchant

- с. По аналогии с названием выберите источник для описания о товаре. Если нужно передавать стандартное описание в товаре, выберите «Описание товара»

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Настройка стандартного фида и маппинг с категориями Google Merchant

d. Выберите источник для статусов наличия товара

The screenshot shows the maneFeed 5 admin interface in a web browser. The browser's address bar displays the URL: `oc3021.e-distributor.com/admin/index.php?route=extension/feed/ocext_feed_generator_google&user_token=de7bcb9398ee7cd77fde67...`. The page title is "manyFeed Feed Generator Pro".

The main content area is titled "Setup data of product presence". It contains several configuration options:

- Attribute design, if they will be added to the description:** A dropdown menu with the value "Attribute group name: attribute name - attribute value".
- Indicate the status of the warehouse, which means that the product is in stock - in stock (required):** A radio button selection with options: "2-3 Days", "In Stock" (selected), and "Out Of Stock".
- Indicate the status of the warehouse, which means that the product is out of stock (out of stock) (required):** A checkbox selection with options: "2-3 Days", "In Stock", "Out Of Stock" (checked), and "Pre-Order".
- Specify the status of the warehouse, which means that the goods are shipped under the order. - preorder:** A checkbox selection with options: "2-3 Days", "In Stock", "Out Of Stock", and "Pre-Order" (checked).
- Unload products with zero remainders (required):** A dropdown menu with the value "Disabled".
- Availability by quantity in the product (or in the corresponding value of the option, if the transfer of variations on options is enabled) (required):** A dropdown menu with the value "Disabled".

Below the "Setup data of product presence" section is the "Price Data setup" section, which includes:

- Price currency:** A dropdown menu with the value "Euro".
- Convert price (from the price value in the product):** A dropdown menu with the value "Disabled".

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Настройка стандартного фида и маппинг с категориями Google Merchant

- е. Если необходимо руководствоваться количеством в товаре, чтобы определять в наличии товар или нет, то укажите данную настройку, как «Включено»

The screenshot displays the configuration interface for maneFeed 5. The interface is divided into several sections with settings for product availability and pricing. The 'Availability by quantity' setting is highlighted with a blue selection bar, indicating it should be set to 'Enabled'.

that the product is in stock - in stock (required) You accept orders for goods and are ready to perform them immediately. Choose this value if you sure that the order will be delivered on time or shipped to the buyer (for example, if this product is already in stock)	<input checked="" type="radio"/> In Stock <input type="radio"/> Out Of Stock
Indicate the status of the warehouse, which means that the product is out of stock (out of stock) (required) You are not accepting orders for this product or it is not available for purchase.	<input type="checkbox"/> 2-3 Days <input type="checkbox"/> In Stock <input checked="" type="checkbox"/> Out Of Stock <input type="checkbox"/> Pre-Order
Specify the status of the warehouse, which means that the goods are shipped under the order. - preorder You are taking orders for the products. To indicate when orders will be shipped, use the availability date attribute	<input checked="" type="checkbox"/> 2-3 Days <input type="checkbox"/> In Stock <input type="checkbox"/> Out Of Stock <input checked="" type="checkbox"/> Pre-Order
Unload products with zero remainders (required) Если выбрать "Выключено", то товары, у которых нулевые остатки не попадут в XML файл. Если выбрать "Включено", то данные товары будут со статусом, как это указано выбрано выше	Disabled
Availability by quantity in the product (or in the corresponding value of the option, if the transfer of variations on options is enabled) (required)	Disabled Enabled Disabled
Price currency	Euro

е. Нажмите «Сохранить»

The screenshot shows the OpenCart admin interface with the manyFeed Feed Generator Pro Edition extension installed. The browser address bar shows the URL: oc3021.e-distributer.com/admin/index.php?route=extension/feed/ocext_feed_generator_google&user_token=de7bcbc9398ee7cd77fde67.... The user is logged in as John Doe.

The left sidebar contains the following navigation menu:

- NAVIGATION
 - Dashboard
 - Catalog
 - Extensions
 - Marketplace
 - Installer
 - Extensions (active)
 - Modifications
 - Events
 - Cron Jobs
 - Design
 - Sales
 - Customers
 - Marketing
 - Custom

The main content area displays the manyFeed Feed Generator Pro Edition settings. The breadcrumb trail is: Home > Promotion channels > manyFeed Feed Generator Pro Edition.

The settings are organized into three steps:

- Step 1: Create product data in feed
- Step 2: Feed creation (product selection)
- Step 3: Feed creation (Links and files creation) (active)

Below the steps, there are links for "Mapping with Google categories" and "Support".

The settings table is as follows:

Module status	Enabled
Enable caching <small>Allows you to reduce the amount of RAM for the layout of large amounts of data, but may require additional time to generate the final feed</small>	Enabled
	Cache level Maximum
Amount of elements (in their tags, deliveries, installments, etc.)	5

A "Save" button is located at the top right of the settings table.

Below the settings table, the section "Link and file settings" is visible.

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Настройка стандартного фида и маппинг с категориями Google Merchant

- f. Проверьте, что фид генерируется. Скопируйте ссылку с token'ом, которая генерирует фид и пишет его файл в буфер обмена компьютера и разместите её в адресной строке браузера. Спустя какое-то время, в зависимости от объема верстки, Вы должны увидеть XML, который необходим для интеграции

- g. Настройка фида завершена. Используйте ссылку для интеграции, как это описано на следующем шаге

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Настройка стандартного фида и маппинг с категориями Google Merchant

7. Использование ссылки, генерирующей фид, или файла, который пишется данной ссылкой

Каждый фид (настройка на шаге 5) имеет две ссылки. Одна ссылка (с token'ом) создает XML при вызове онлайн (динамически). Используйте эту ссылку, если необходимо обновлять файл (файл вызывается второй ссылкой).

Вы можете передавать данную ссылку сразу в Google Merchant, Facebook, но должны учитывать, что вызов ссылки создает нагрузку на сервер. Если данная ссылка будет передана и в Google Merchant, Facebook одновременно, или если ссылок много, то маркетплейсы будут создавать нагрузку часто, и параллельно. В этом случае, рекомендуется вызывать ссылку с token'ом самостоятельно, например, в браузере (или через планировщик хостинга, например CRON), а в маркетплейсы передавать вторую ссылку, которая представляет собой статический файл, образующийся всякий раз, как вызывается первая ссылка с token'ом

8. Команда на CRON

Для автоматического создания файла, используйте следующую команду (всё, что красным, заменив URL):

```
wget -O - -q -t 1 'URL';
```

Где **URL** – это ссылка с token'ом. Если на Вашем хостинге не используется CRON, и выключен WGET, то уточните в поддержке хостинга какой командой Вы можете запускать ссылку сайта
