

Setting up standard feed and mapping with Google Merchant Center categories for module versions:

- manyFeed 5 PRO Edit.
- manyFeed 5 Basic Edit.

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

1. For quick integration with Google Merchant, it is necessary to have a number of basic data about the product, the transmission setting of which will be described below.
 - a. The goods must have given: names, models (or any other numeric or alphabetic articles, including their own),
 - b. The name of the manufacturer (brand, or brand), the price of the goods.
 - c. For mapping with Google categories, products must have links to site categories.
2. Enter the manyFeed 5 module, click on the pencil to the right of the module name

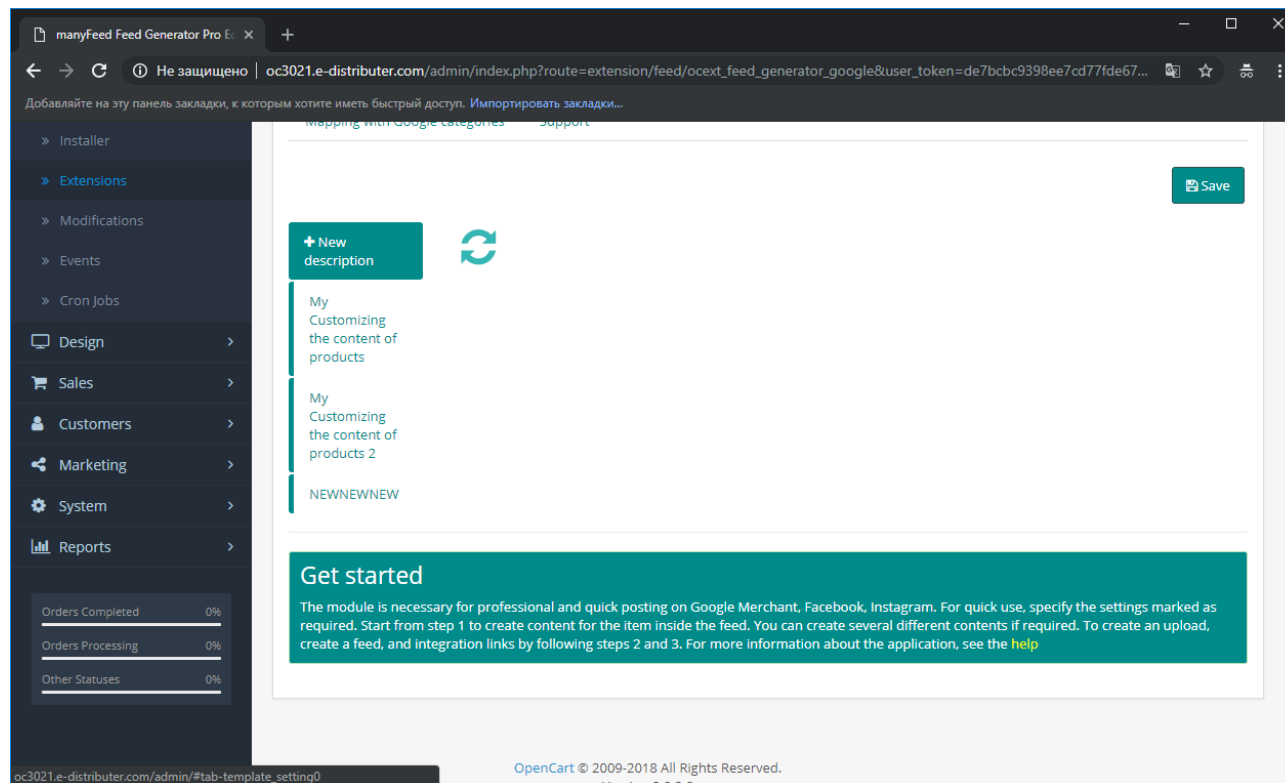

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

3. Enter tab 1, and click on the bookmark: “+ New Description”

“Descriptions” are product information settings templates that can be applied to different products of the site, depending on the category, or manufacturer, or other value of the goods. For example, if you need to unload special prices only for certain products, or you need to divide an OpenCart product by color (create variations in color) only for products in the “such and such” category, then you need to create a description with settings for each such case. If all products must have the same content, it is enough to create one description, and subsequently apply only it, as will be shown in the next steps of the instruction.

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

4. In the settings window that appears, make the following settings
 - a. Think up any name for this description to know later what kind of settings it contains.

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

- b. Select a data source for the product name. If you need a standard name from the product card, then select "Product Name". You can also make a name compiled from different data elements of the product, or from some field of the product, for example meta data.

- c. By analogy with the name, select the source for the description of the product. If you want to send a standard description in the product, select "Product Description"

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

The screenshot displays the maneFeed 5 admin interface in a web browser. The browser's address bar shows the URL: `oc3021.e-distributer.com/admin/index.php?route=extension/feed/ocext_feed_generator_google&user_token=de7bcbc9398ee7cd77fde67...`. The interface has a dark sidebar on the left with navigation links for 'Marketing', 'System', and 'Reports'. Below these links is a summary section titled 'NEWNEWNEW' with three rows: 'Orders Completed' (0%), 'Orders Processing' (0%), and 'Other Statuses' (0%). The main content area is titled 'description: product description setup' and contains three configuration sections: 1. 'Customize - description (required)' with a dropdown menu set to 'Product description'. 2. 'Add options in description' with a dropdown menu set to 'Disabled'. 3. 'Add attributes to description' with a dropdown menu set to 'Disabled'. Below these sections is a 'Description Template' area containing a list of placeholders and their corresponding OpenCart attributes: `[[name]]` - product's name, `[[description]]` - description, `[[meta_description]]` - products's meta, `[[attributes_ul]]` - attribute as list, `[[attributes_table]]` - attribute as table, `[[attributes_p]]` - attribute as paragraphs, `[[options_table]]` - options as table, `[[options_ul]]` - options as list, `[[options_p]]` - option as paragraphs, and `[[NAME OF COLUMNS IN THE TABLE OF PRODUCTS]]` - will display the value of this column in the product (meta_description, meta_title, meta_keyword, manufacturer...). To the right of the template is a rich text editor with a toolbar including bold, italic, underline, font color, background color, bulleted list, numbered list, link, unlink, image, video, table, source code, and help icons. The editor is currently empty.

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

d. Select source for stock status

The screenshot shows the maneFeed 5 administration interface in a web browser. The browser's address bar displays the URL: `oc3021.e-distributer.com/admin/index.php?route=extension/feed/ocext_feed_generator_google&user_token=de7bcbc9398ee7cd77fde67...`. The page title is "manyFeed Feed Generator Pro".

The interface is divided into two main columns. The left column contains descriptive text and instructions for each setting. The right column contains the corresponding configuration options, which include radio buttons, checkboxes, and dropdown menus.

The "Setup data of product presence" section is highlighted with a teal header. It contains the following settings:

- Attribute design, if they will be added to the description:** A dropdown menu with the value "Attribute group name: attribute name - attribute value".
- Indicate the status of the warehouse, which means that the product is in stock - in stock (required):** A radio button selection with options: "2-3 Days", "In Stock" (selected), and "Out Of Stock".
- Indicate the status of the warehouse, which means that the product is out of stock (out of stock) (required):** A checkbox selection with options: "2-3 Days", "In Stock", "Out Of Stock" (checked), and "Pre-Order".
- Specify the status of the warehouse, which means that the goods are shipped under the order. - preorder:** A checkbox selection with options: "2-3 Days", "In Stock", "Out Of Stock", and "Pre-Order" (checked).
- Unload products with zero remainders (required):** A dropdown menu with the value "Disabled".
- Availability by quantity in the product (or in the corresponding value of the option, if the transfer of variations on options is enabled) (required):** A dropdown menu with the value "Disabled".

The "Price Data setup" section is also visible below the "Setup data of product presence" section. It includes:

- Price currency:** A dropdown menu with the value "Euro".
- Convert price (from the price value in the product):** A dropdown menu with the value "Disabled".

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

- e. If you need to be guided by the quantity in the product to determine whether the product is available or not, then specify this setting as “Enabled”

The screenshot shows the 'manyFeed Feed Generator Pro' administration interface in a web browser. The browser's address bar shows the URL: `oc3021.e-distributer.com/admin/index.php?route=extension/feed/ocext_feed_generator_google&user_token=de7bcbc9398ee7cd77fde67...`. The page contains several configuration settings for the Google XML Product Feed Generator. The 'Availability by quantity in the product (or in the corresponding value of the option, if the transfer of variations on options is enabled) (required)' setting is highlighted with a blue selection bar, and its dropdown menu is open, showing 'Disabled', 'Enabled', and 'Disabled' options. Other visible settings include 'that the product is in stock - in stock (required)' with radio buttons for 'In Stock' and 'Out Of Stock', 'Indicate the status of the warehouse, which means that the product is out of stock (out of stock) (required)' with checkboxes for '2-3 Days', 'In Stock', 'Out Of Stock', and 'Pre-Order', 'Specify the status of the warehouse, which means that the goods are shipped under the order. - preorder' with checkboxes for '2-3 Days', 'In Stock', 'Out Of Stock', and 'Pre-Order', 'Unload products with zero remainders (required)' with a 'Disabled' dropdown, 'Price currency' with a 'Euro' dropdown, 'Convert price (from the price value in the product card): specify currency of price' with a 'Disabled' dropdown, 'Convert price (from the price value in the product card): specify the currency in which you need to convert the price' with a 'Disabled' dropdown, and 'If the product goes on sale, transfer the price of the sale?' with a 'Disabled' dropdown.

that the product is in stock - in stock (required) You accept orders for goods and are ready to perform them immediately. Choose this value if you are sure that the order will be delivered on time or shipped to the buyer (for example, if this product is already in stock)	<input checked="" type="radio"/> In Stock <input type="radio"/> Out Of Stock
Indicate the status of the warehouse, which means that the product is out of stock (out of stock) (required) You are not accepting orders for this product or it is not available for purchase.	<input type="checkbox"/> 2-3 Days <input type="checkbox"/> In Stock <input checked="" type="checkbox"/> Out Of Stock <input type="checkbox"/> Pre-Order
Specify the status of the warehouse, which means that the goods are shipped under the order. - preorder You are taking orders for the products. To indicate when orders will be shipped, use the availability date attribute	<input type="checkbox"/> 2-3 Days <input type="checkbox"/> In Stock <input type="checkbox"/> Out Of Stock <input checked="" type="checkbox"/> Pre-Order
Unload products with zero remainders (required) Если выбрать "Выключено", то товары, у которых нулевые остатки не попадут в XML файл. Если выбрать "Включено", то данные товары будут со статусом, как это указано выбрано выше	Disabled
Availability by quantity in the product (or in the corresponding value of the option, if the transfer of variations on options is enabled) (required)	Disabled Enabled Disabled
Price currency	Euro
Convert price (from the price value in the product card): specify currency of price	Disabled
Convert price (from the price value in the product card): specify the currency in which you need to convert the price	Disabled
If the product goes on sale, transfer the price of the sale?	Disabled

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

- f. Select the currency in which you want to place the prices of goods. And specify the conversion, if necessary. The exchange rate is set in the localization / currency section in the store settings

The screenshot shows the maneFeed Feed Generator Pro admin interface. The browser address bar indicates the URL: oc3021.e-distributer.com/admin/index.php?route=extension/feed/ocext_feed_generator_google&user_token=de7bcbc9398ee7cd77fde67.... The interface is in Russian. The 'Price Data setup' section is highlighted in green. It contains the following settings:

Price Data setup	
Price currency	Euro
Convert price (from the price value in the product card): specify currency of price	Euro
Convert price (from the price value in the product card): specify the currency in which you need to convert the price	Pound Sterling
If the product goes on sale, transfer the price of the sale?	Disabled
Setup - sale_price_effective_date	Disabled
Indicate on which percentage, need to change prices <small>If the fraction with dot separator, for example, -10.5 (negative ten point five) - this will mean that the price should be reduced by 10.5%. To increase the price you don't need to specify "+". Just don't put a minus in front of a number</small>	
Installment - installment	Disabled
Tax - tax	Disabled

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

- g. If the goods do not have GTIN (EAN, UPC and other unified identifiers), then specify any text identifier (model or article) in the MPN setting and the name of the manufacturer in the Brand setting

The screenshot shows the maneFeed 5 configuration interface in a web browser. The browser address bar shows the URL: `oc3021.e-distributer.com/admin/index.php?route=extension/feed/ocext_feed_generator_google&user_token=de7bcbc9398ee7cd77fde67...`. The interface is in Russian. The main configuration area is titled "Product Identification" and includes several settings:

- Cost, type and region of delivery - **shipping**: Disabled
- Setup **gtin**: Disabled (UPC (for USA), EAN (for Europe), JAN (for Japan) and ISBN (books))
- Setup **mpn**: Model
- Has an ID- **identifier_exists**: Do not display the tag
- Setup - **brand**: Disabled (dropdown menu is open)

The dropdown menu for the **brand** setting is open, showing the following options:

- Disabled
- Text field
- Product name
- Product's Meta-title(if empty, the product will not be unloaded)
- Product's ID (from the product's card - product_id)
- Model
- SKU
- UPC
- EAN
- JAN
- ISBN
- MPN
- Location (from the product card - location)
- Manufacturer (specified in the product card)** (highlighted)

Below the **brand** dropdown, there is a section titled "Selection of" with the following settings:

- Transfer products without images
- Image size (1:1), recommended value: 500, minimal value: 100
- Transfer original images (disable caching)
- Maximum number of additional images (required)
- Google Product Category **google_product_category**: Full path to the Google category where you want to place products

If you have a GTIN, then specify it. For details on which identifiers should be included, see here: <https://support.google.com/merchants/answer/6324461?hl=en>

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

- h. Disable caching of images so as not to create an extra cache of images, and also specify whether to transfer images without images (disabled by default) and how many images should be sent to the feed for each product within this description (the default is one image)

The screenshot shows the configuration interface for the maneFeed 5 Google XML Product Feed Generator. The interface is divided into two main sections: 'Image setup' and 'Selection of products by description'.

Image setup section:

- Setup - **mpn**: Model
- Has an ID- **identifier_exists**: Do not display the tag
- Setup - **brand**: Disabled
- Image setup** (Section Header)
- Transfer products without images: Disabled
- Image size (1:1), recommended value: 500, minimal value: 100
- Transfer original images (disable caching): Disabled
- Maximum number of additional images (required): Enabled

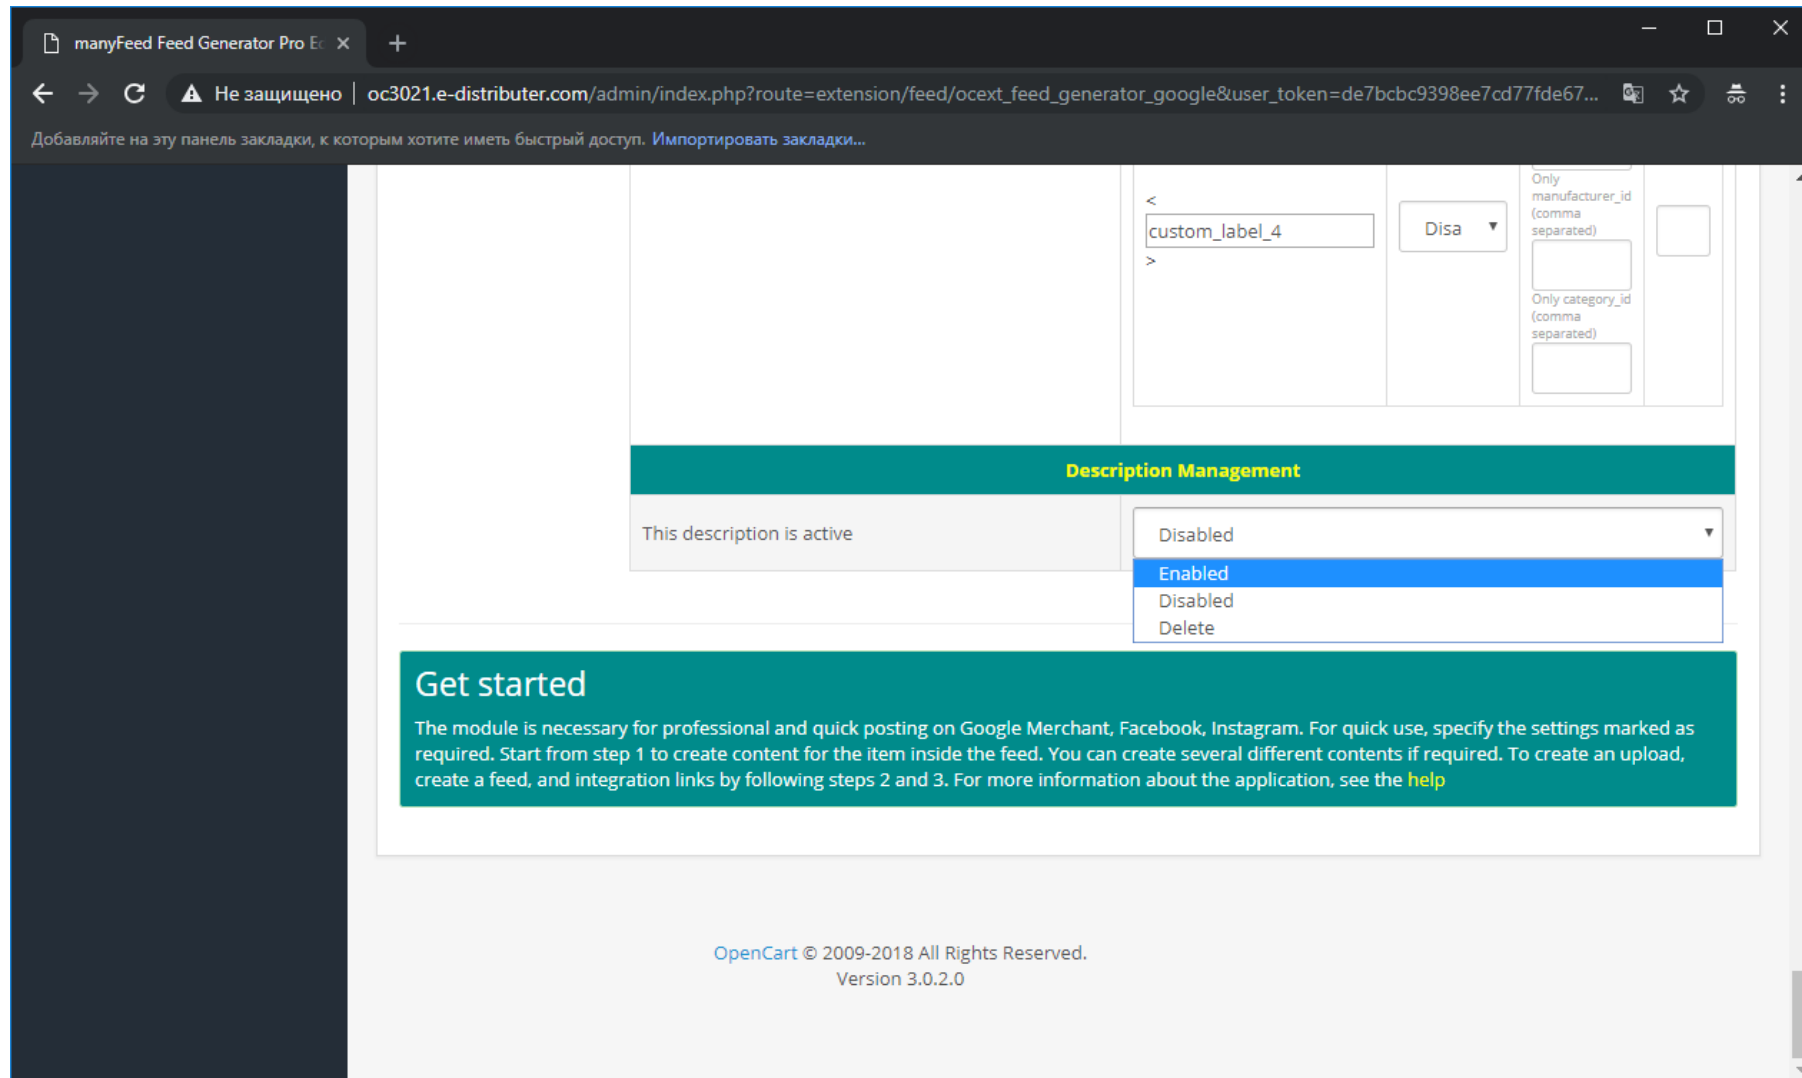

Selection of products by description section:

- Google Product Category **google_product_category**: Disabled
- Setup **product_type**: Disabled
- Min price (inclusive):

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

- i. Activate this description

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

j. Click save at the top of the page

The screenshot shows the OpenCart admin interface with the manyFeed Feed Generator Pro Edition extension installed. The browser address bar shows the URL: `oc3021.e-distributer.com/admin/index.php?route=extension/feed/ocext_feed_generator_google&user_token=de7bcb9398ee7cd77fde67...`. The user is logged in as John Doe.

The left sidebar contains a navigation menu with the following items:

- Dashboard
- Catalog
- Extensions
 - Marketplace
 - Installer
 - Extensions (active)
 - Modifications
 - Events
 - Cron Jobs
- Design
- Sales
- Customers
- Marketing
- Custom

The main content area displays the "manyFeed Feed Generator Pro Edition" interface. It includes a breadcrumb trail: Home > Promotion channels > manyFeed Feed Generator Pro Edition. The interface is divided into three steps:

- Step 1: Create product data in feed (active)
- Step 2: Feed creation (product selection)
- Step 3: Feed creation (Links and files creation)

Under Step 1, there are two tabs: "Mapping with Google categories" and "Support". A "Save" button is located at the top right of the form.

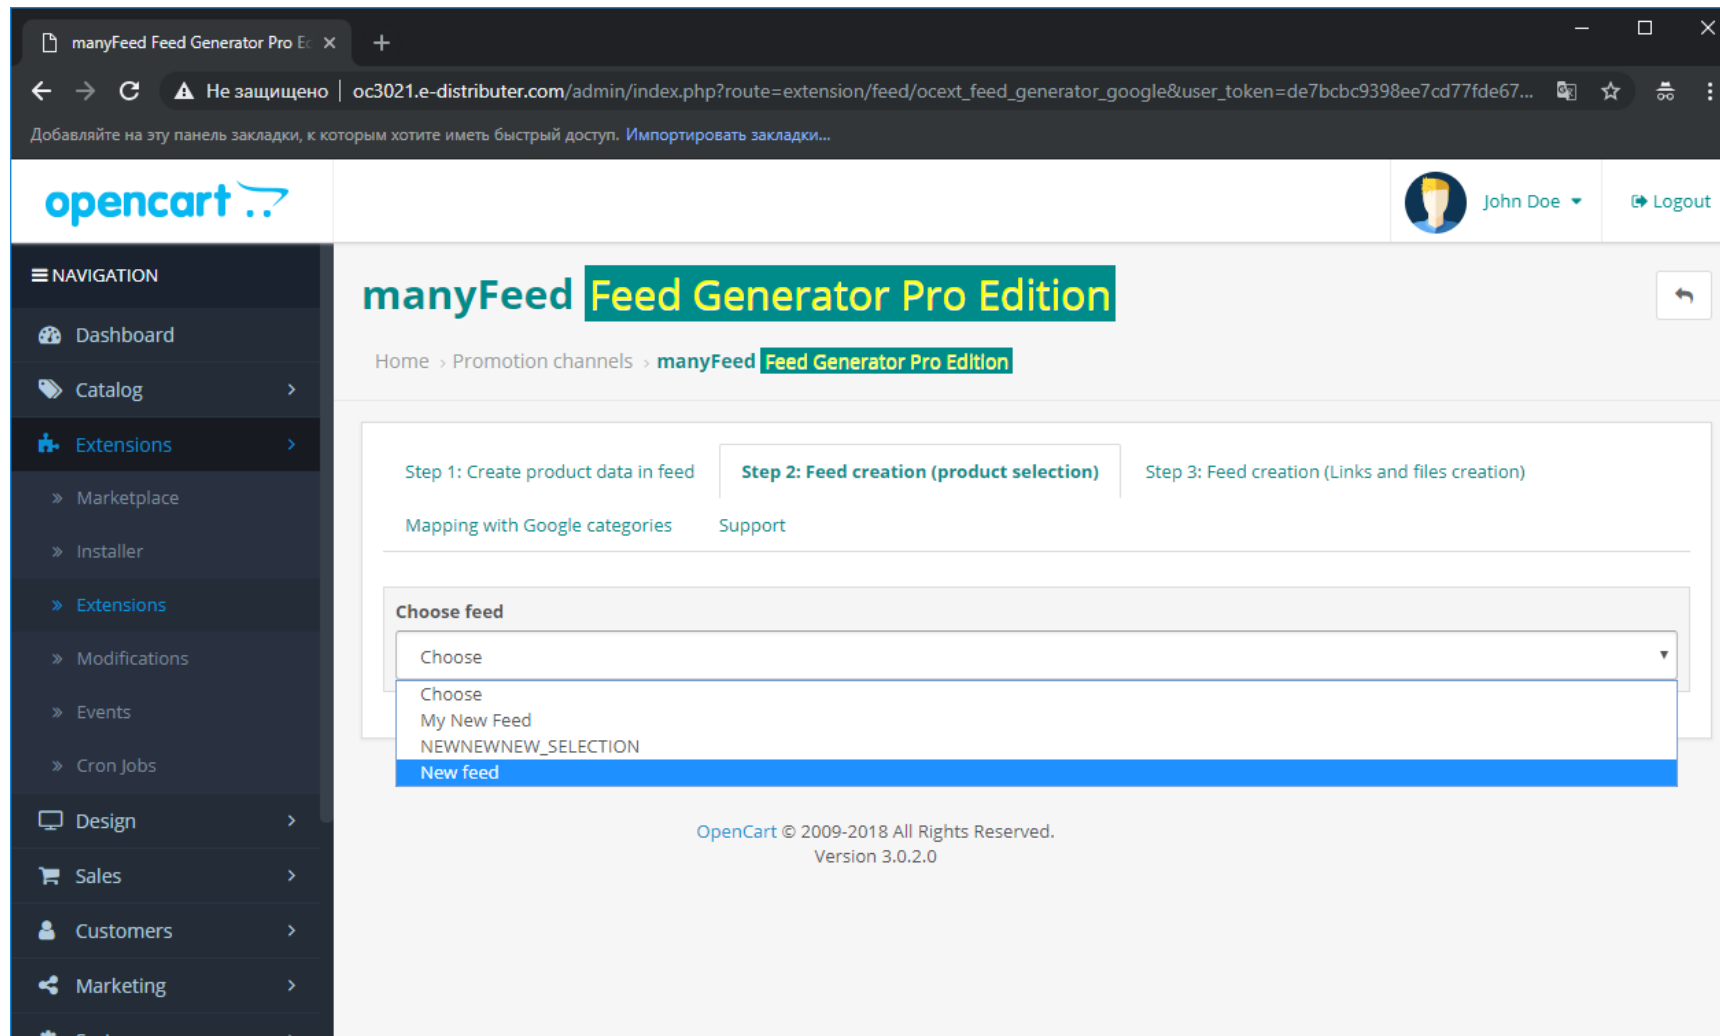

The form contains the following sections:

- Стандартный Фид**: A section with a dropdown menu labeled "Take based on the previously created description ..." and a "Choose" button.
- My Customizing the content of products**: A section with a text input field labeled "The name of this description".
- My Customizing the content of products 2**: A section with a dropdown menu labeled "The way of forming the product name - title (required)" and a "Disabled" button.
- description: product description setup**: A section with a text input field.

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

5. Creating a feed - step 2
 - a. Choose “new feed” and think up its name.

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

- b. Select the name of the description that was created in paragraph 4, the name was created as indicated in paragraph 4.a. After that, when creating a feed, the goods will be applied to the settings created within the description

Only latin letters and numbers Link can be used without file (links below) for placement in the marketplace. However, calling this link creates a overload on the server when updating data. <input type="text" value="24235"/> 24235 <input type="text" value="http://oc3021.e-distributer.com/index.php?route=extension/feed/ocext_feed_generator_google&token=24235"/>
The name of the file to which the feed will be written when calling the link above. Only latin letters and numbers A file is created whenever the link above is called. You can update the file by calling the link above in schedule on the CRON hosting <input type="text" value="http://oc3021.e-distributer.com/ocext_google_feed.xml"/> Copy link: <input type="text" value="http://oc3021.e-distributer.com/ocext_goc"/>	

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

e. Click "Save"

The screenshot shows the OpenCart admin interface with the manyFeed Feed Generator Pro Edition extension installed. The browser address bar shows the URL: http://oc3021.e-distributer.com/admin/index.php?route=extension/feed/ocext_feed_generator_google&user_token=de7bcbc9398ee7cd77fde67.... The user is logged in as John Doe. The left sidebar shows the navigation menu with options like Dashboard, Catalog, Extensions, Marketplace, Installer, Modifications, Events, Cron Jobs, Design, Sales, Customers, Marketing, and Custom. The main content area displays the manyFeed Feed Generator Pro Edition settings. The interface is divided into three steps: Step 1: Create product data in feed, Step 2: Feed creation (product selection), and Step 3: Feed creation (Links and files creation). The current step is Step 3. The settings include: Module status (Enabled), Enable caching (Enabled), Cache level (Maximum), and Amount of elements (in their tags, deliveries, installments, etc.) (5). A 'Save' button is visible in the top right corner of the settings area. Below the settings, there is a section for 'Link and file settings'.

openCart

manyFeed Feed Generator Pro Edition

Home > Promotion channels > manyFeed Feed Generator Pro Edition

Step 1: Create product data in feed Step 2: Feed creation (product selection) Step 3: Feed creation (Links and files creation)

Mapping with Google categories Support

Save

Module status Enabled

Enable caching Enabled
Allows you to reduce the amount of RAM for the layout of large amounts of data, but may require additional time to generate the final feed

Cache level Maximum

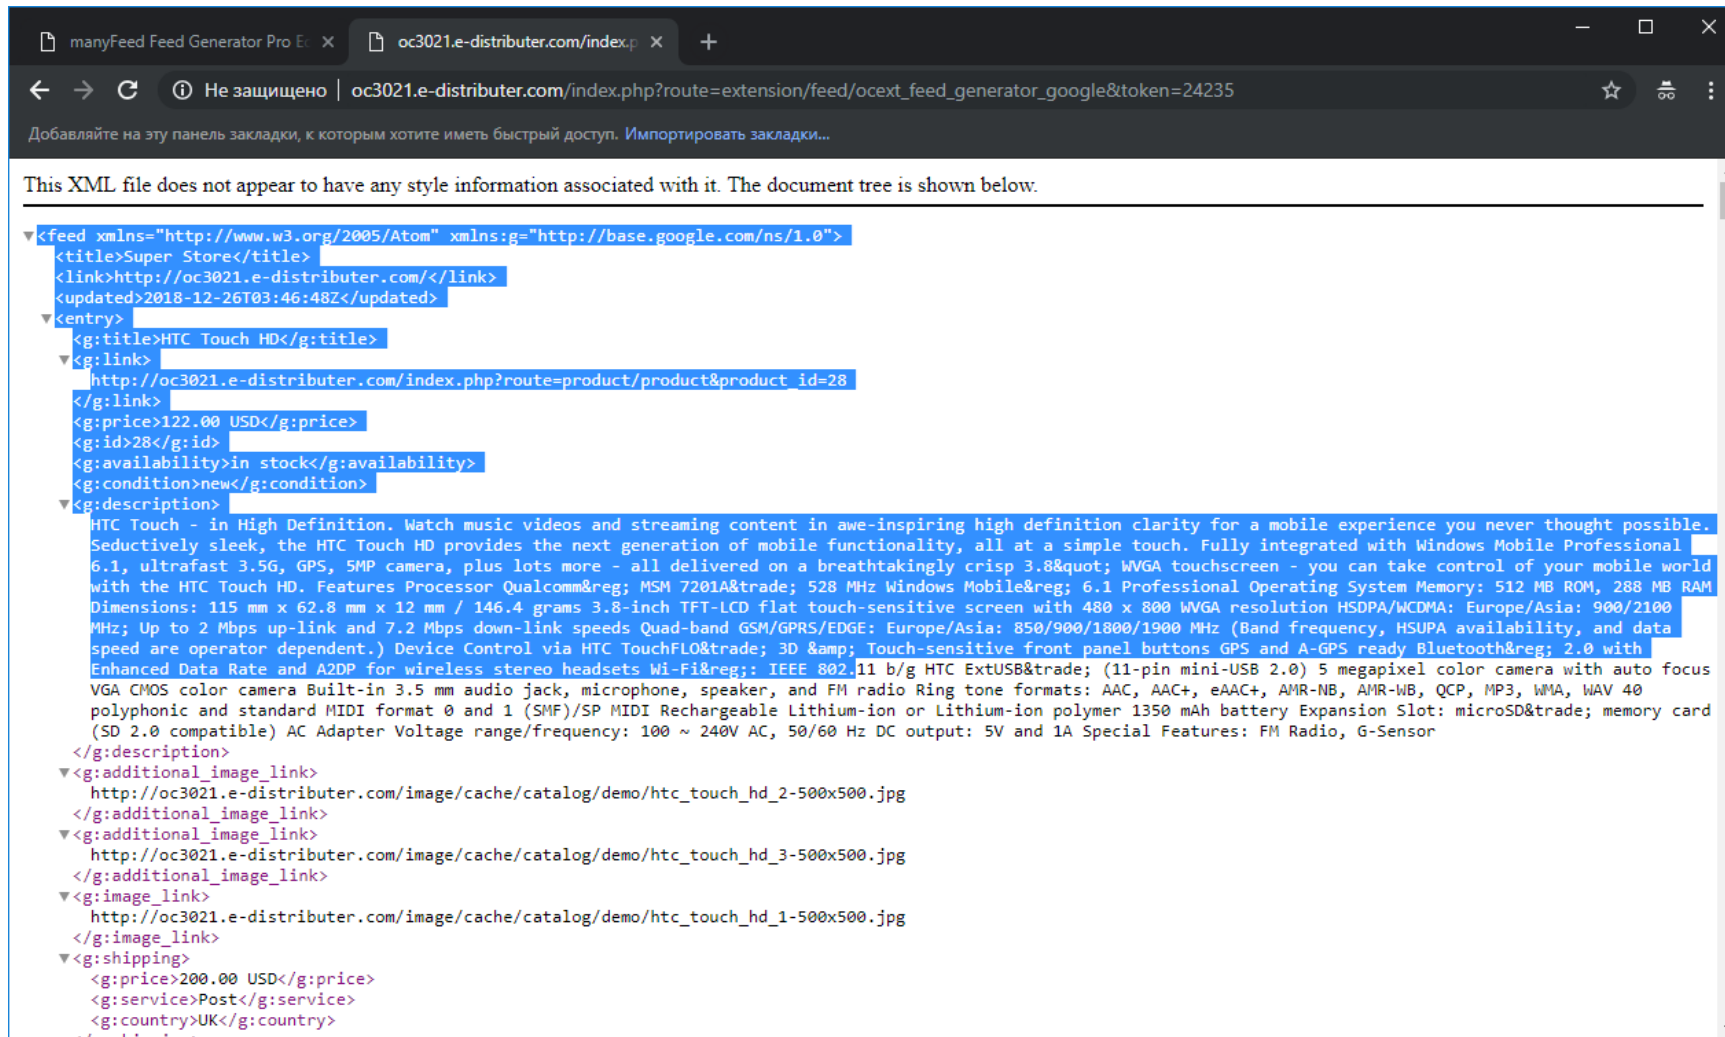

Amount of elements (in their tags, deliveries, installments, etc.) 5

Link and file settings

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

- f. Check that the feed is generated. Copy the link with the token that generates the feed and writes its file to the computer's clipboard and place it in the address bar of the browser. After some time, depending on the size of the layout, you should see the XML that is needed for integration

maneFeed 5 – Google XML Product Feed Generator for OpenCart 2, OpenCart 3

Setting up standard feed and mapping with Google Merchant Center categories for module versions

g. Feed setup complete. Use the link to integrate as described in the next step.

7. Using a link that generates a feed, or a file that is written by this link

Each feed (setup in step 5) has two links. One link (with a token) creates XML when called online (dynamically). Use this link if you need to update the file (the file is invoked by the second link).

8. CRON Directive

To automatically create a file, use the following command (all that is red, replacing the URL):

```
wget -O - -q -t 1 'URL';
```

Where **URL** is a token link. If your hosting does not use CRON, and WGET is turned off, then specify in the hosting support which team you can launch the site link
